DETAILED ACTION

Claims 32-54 are still at issue and are present for examination.

Applicants' arguments filed on 12-24-01, paper No. 18, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Applicant's letter of 11-21-01 requesting, pursuant to 37 CFR statute 1.607 for interference with US Patents 6,107,265 and 6,162,782 has been noted.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 32-54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 12 of U.S. Patent No. 5,948,672. Although the conflicting claims are not identical, they are not patentably distinct from each other because of identical subject matter. The claims of the instant application when examined in light of the specification of the issued patent reveals that the fungal cellulase enzyme in the composition of

Art Unit: 1652

the instant application is similar to the enzyme described in the Patent. Therefore, even though the invention does not appear to be identical it would be obvious to one skilled in the art to claim a composition comprising the fungal cellulase based on specific characteristics of the enzyme in the patent.

In response to the previous Office action, applicants have argued that they will overcome the above rejection by filing a Terminal Disclaimer (TD). However, no such TD has been filed so far. Unless the applicant files a proper TD and the TD is accepted by the Office, the above rejection has not been overcome and Examiner continues to maintain the above rejection. Furthermore, an interference cannot be set up until all the claims are in condition for allowance. The above claims will be in condition of allowance when a proper TD has been filed and such a TD has been accepted by the Office.

Conclusion

No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1652

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
